

# The Cycle of Life

Cut this circle out. Then, cut on the dotted lines. You may color and decorate your wheel cover. Place the wheel cover on top of the wheel with the life cycle phases on it. Place a metal brad through the center of the wheels to secure them. As you turn the wheel, write the name of each life cycle stage and how long each stage lasts.

# The Cycle of Life

Cut out the entire circle. Glue it onto construction paper and cut around the circle, leaving some of the construction paper showing.
