

Camouflage on the Coral Reef

(What are coral reefs? Click [here](#) to learn more!)

Camouflage is how animals use their body shape and coloration to hide from predators. Find and circle the hidden animal in each picture:

Can You Find the Fish?

Create your own coral reef in the space below. Then create your own reef animals, or color the animals on the following page so that they will be able to camouflage in your reef. Cut the animals out and paste them on your reef. See if your family can find the hidden animals!
