

# Shark Senses

Sharks are considered to be top predators in their habitats. Their unique adaptations have allowed them to become one of the most efficient hunters in nature. Check out this [video](#) on shark senses, then answer the questions below:

- 1) How many senses do sharks have?
- 2) How are they similar to human senses? How are they different?
- 3) List each sense and describe how it helps a shark survive:
- 4) Which sense is strongest in sharks? Which is the weakest?

# Ultimate Predator!

Create your own ultimate predator in the space below. Label each adaptation and explain its purpose/function. (Be creative!)
